

Name of Presentation: Let Me Learn Awareness Session

Target Audience: 11-16 year olds in
Maltese schools

Cody Martin

- I have always been known for being really clean and tidy. At school, I like to present neat work which is organised. When I go out, I like to wear matching clothes and style my hair.
- I like researching and knowing facts. I strive to be the best and my grades show this. Usually I like to verify things by looking up information
- I also like science experiments and I am very comfortable when it comes to using laboratory equipment.
- I don't like it if I have to change my plans, or if asked to come up with ideas.

Hermione Granger

- Books are my passion. I love reading and researching as these keep me informed. I need to know more and I get very frustrated when I don't find the answers I need. I like taking tests because I have the opportunity to show what I know.
- I do not consider myself to be a risk taker. In fact, this is the reason why I sometimes come into conflict with my friends, because they follow their ideas without thinking about the consequences.
- Sometimes I find myself coming up with a plan or a solution for a situation that crops up. I consider myself to be a very organised person.

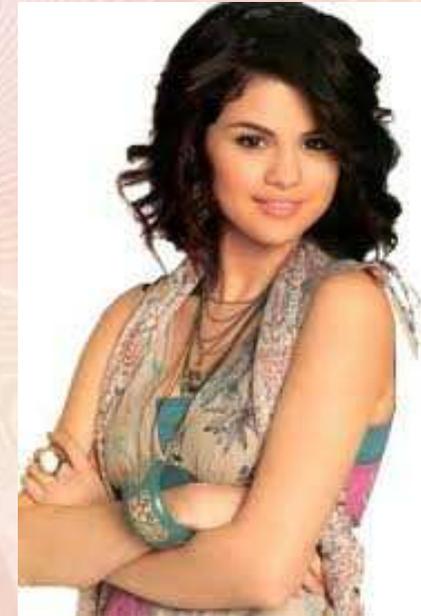

Inspector Gadget

- I work with different tools and I always carry all sorts of gadgets with me. If one of my gadgets doesn't work I fix it.
- I am able to come up with different ideas. I do not mind risking with my own ideas especially in difficult situations.
- I like having a routine. Being on time is very important for me. I put my clothes and shoes in exactly the same place every day but I don't consider myself as giving neatness a lot of importance in my life.

Alex Russo

- I am a wizard and love doing magic. Magic allows me to follow my own ideas. It doesn't matter if my idea is out of this world for other people. I follow it through because I don't mind taking a risk. This gets me in a lot of trouble especially with my dad.
- I don't like reading a lot but I do use books especially if I need to find an old magic spell which I really need to follow my ideas or to try and get me out of trouble.
- I don't mind living in a messy environment and although I love colours a lot, I am always very careful to look my best.

The Let Me Learn Process

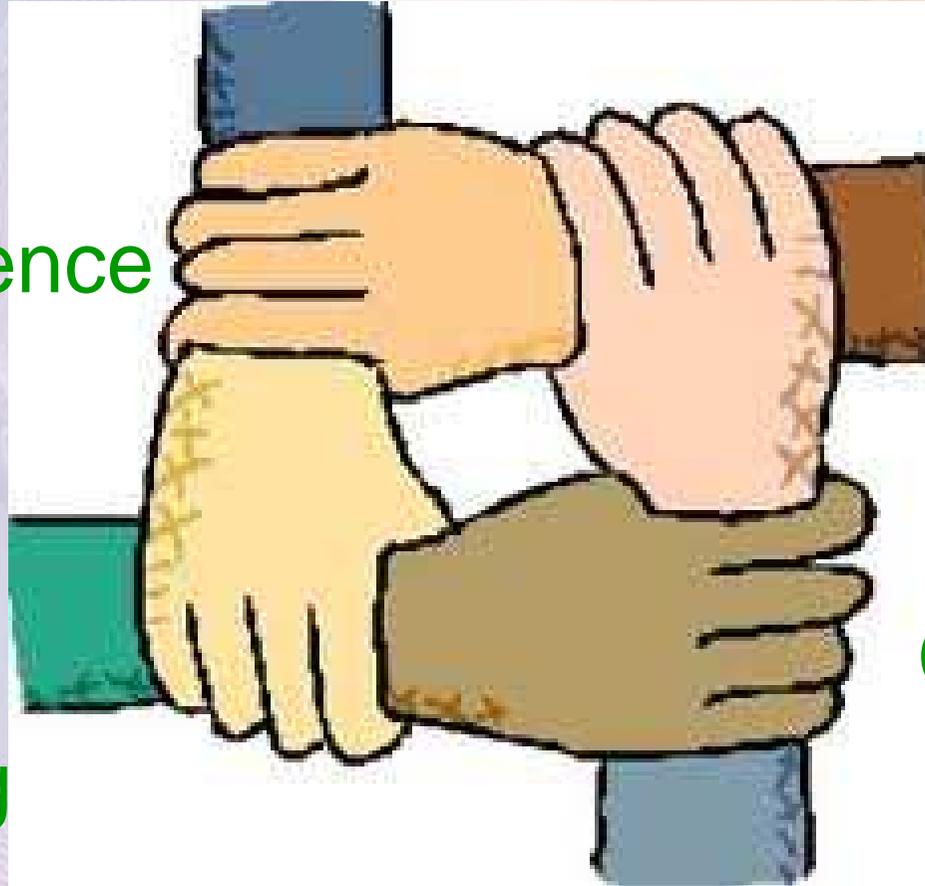

The four Learning Patterns

Sequence

Precision

Technical
Reasoning

Confluence

Sequence

order and consistency

- Clear directions and examples
- Planning
- Time to finish off assigned or planned tasks
- Organisation and neatness

Who has shown use of sequence?

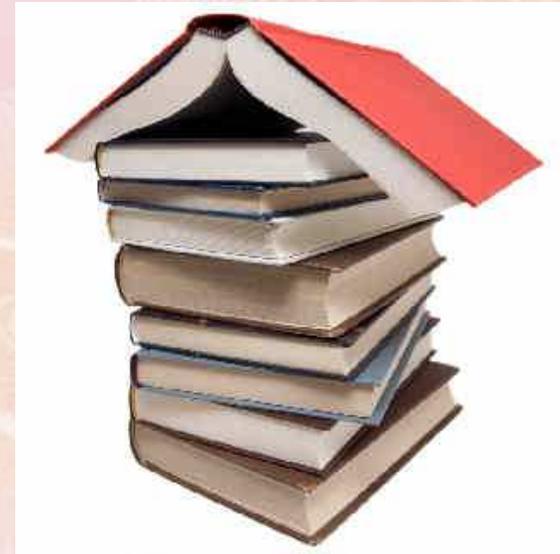

- I have always been known for being really **clean and tidy**. At school, I like to present **neat** work which is **organised**. When I go out, I like to wear matching clothes and style my hair.
- I like having a routine. **Being on time** is very important for me. I put my clothes and shoes in the **same** place everyday but I don't consider myself as giving neatness a lot of importance in my life.

Precision

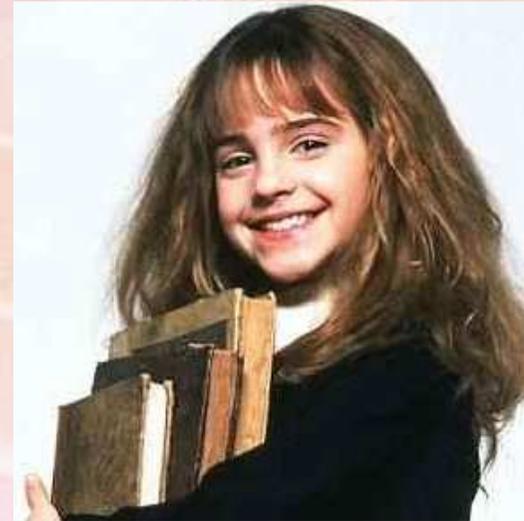

detailed, exact information

- Details
- Facts
- Asks questions to obtain more information
- Writes and explains in length

Who has shown use of precision?

- Books are my passion. I love reading and researching as these keep me informed. I need to know more and I get very frustrated when I don't find the answers I need. I like taking tests because I have the opportunity to show what I know.
- I like researching and knowing facts. I strive to be the best and my grades show this. Usually I like to verify things by looking up information.

Technical Reasoning

relevance, hands-on and problem-

- Needs a link between what is being done/asked of him/her and real life experiences.
- Prefers to show knowledge through construction of models and problem-situations.
- Has a special affinity with tools

Who has shown use of technical reasoning?

- I work with different **tools** and I always carry all sorts of gadgets with me. If one of my gadgets doesn't work I try to **fix** it.
- I also like science experiments and I am very comfortable when it comes to using lab **equipment**.

Confluence

originality and spontaneity

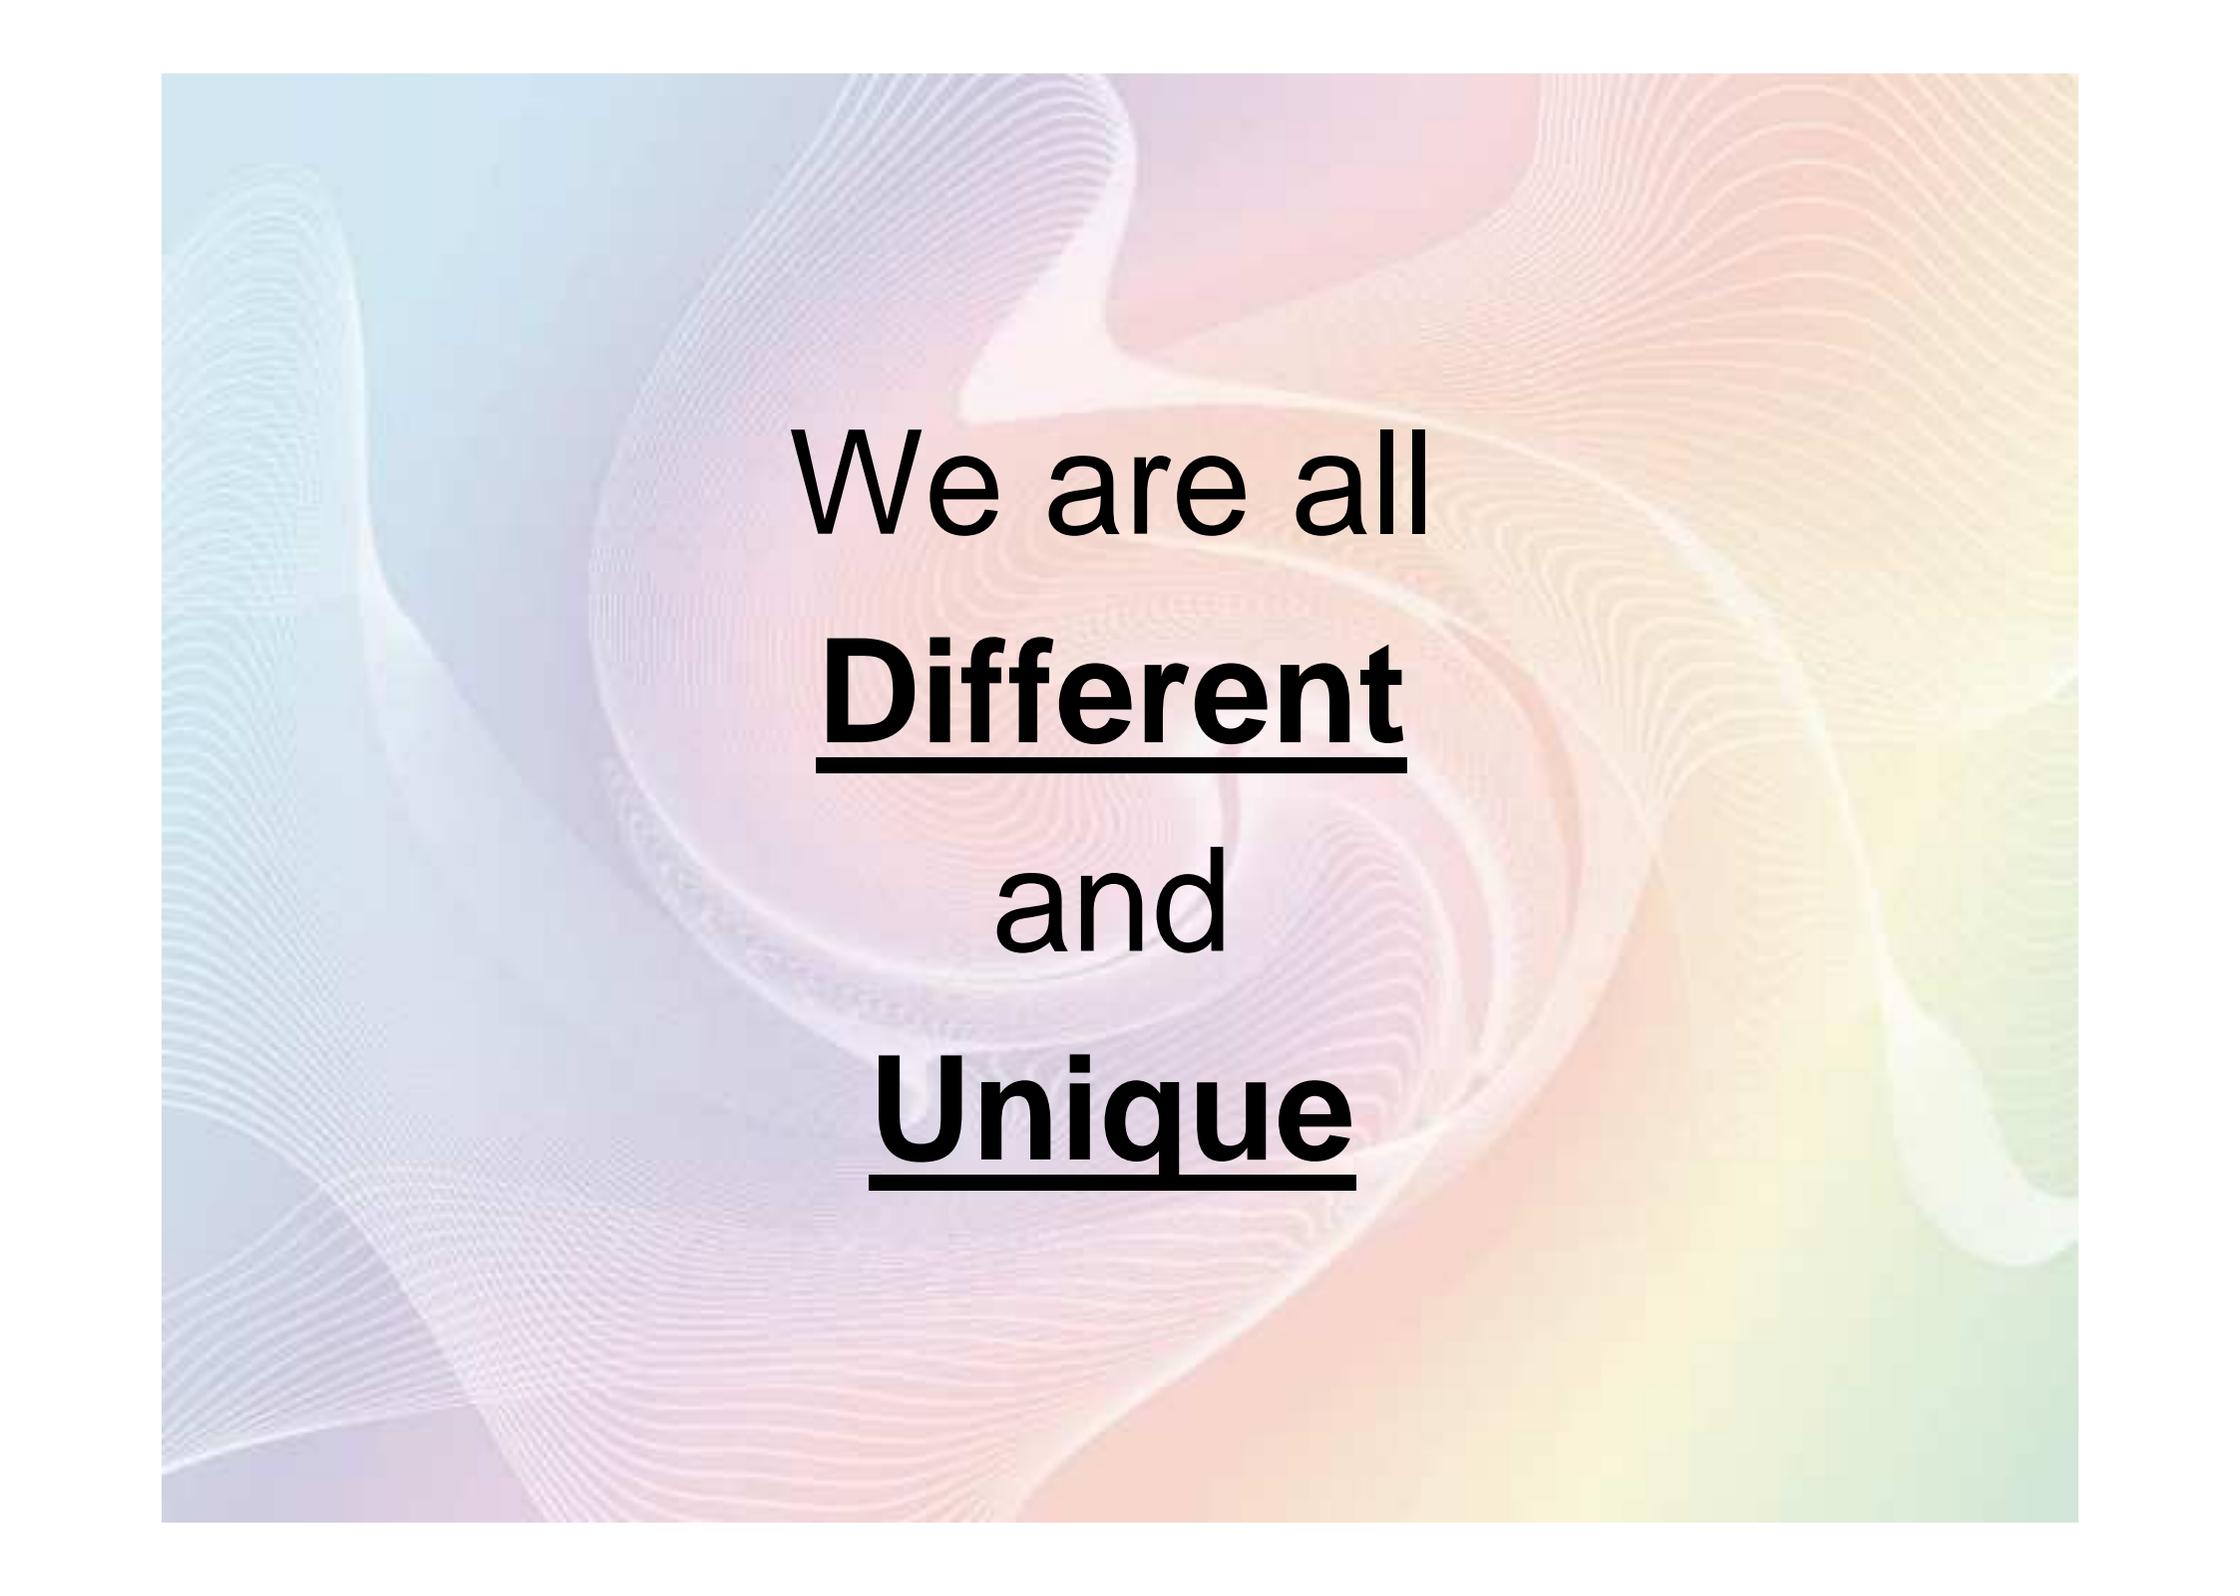

- Comes up with original ideas
- Seeks to present knowledge in a creative way
- Risks with own ideas
- Performs in front of an audience

Who has shown use of Confluence?

- I am a wizard and love doing magic. Magic allows me to follow my **own ideas**. It doesn't matter if my ideas are out of this world for other people. I follow them through because I don't mind taking **risks**. This gets me in a lot of trouble especially with my dad.
- I am able to come up with **different ideas**. I do not mind **risking with my own ideas** especially in difficult situations.

We are all
Different
and
Unique
